## School Board OK's Budget Over Protest

The Albany Board of Education today has given its tentative approval of a record high budget for 1954-55, but over the protests of member John C. Longaker.

The Board voted 4-1 at the Tuesday evening meeting to accept the \$1,318,900 budget proposed by Dr. Paul C. Bryan, superintendent of schools, with the explanation that changes could be made before its final adoption of August 8.

Mr. Longaker criticized the School Board for passing so large a budget in so little time. He suggested holding special sessions to scrutinize work sheets "item by item" so that each member would be able to question how district money is to be spent.

"I am of the opinion that many thousands of dollars can be eliminated from the budget simply by taking a little time," said Longaker. He pointed out that the City Council, which has a budget amounting to less than half of the School District's, spends about two weeks working over its budget.

Board member Mrs. Desla Walton took exception to Longaker's statements. In the first place, she said the City Council has no executive officer to do the work for them. She explained that school district budget details were worked out by Dr. Bryan, while the city relied entirely on City Council members without any assistance of a full-time administrator. Mrs. Walton also explained that the preliminary figure had to be approved before July 1, when it must be filed with the County Superintendent of Schools.

Board President Dr. Philip Meads agreed with Mrs. Walton and added "we are going beyond the providence of a school board in questioning these items." He pointed out that the Board was not passing the budget without an understanding of its contents.

Mr. Longaker replied that the Board is legally responsible for every penny spent in the district and "I can't succumb to the theory of the Superintendent taking the entire responsibility."

In other action, the Board accepted Dr. Bryan's recommendation to pay teachers, administrators and non-certificated employee according to the wage scales now in effect, and to consider adjustments for 1954-55 in September and October.

Dr. Bryan said that waiting until Fall would allow the school administration to determine a more accurate estimate of the number of employees required for 1954-55.

The teachers' salary committee submitted a letter stating it was in accord with Dr. Bryan's recommendations.

## \$582,503 Budget Asked for 1954-55

## No Increase In City Tax Rate Seen

The Albany City Council today is conducting its annual budget sessions to consider requests for expenditures totaling \$582,503.55 for the 1954-55 fiscal year.

The proposed budget submitted by the various department heads is \$504.65 greater than expenditures owed for the current year, but city officials have indicated there could be little, if any change, in the present tax rate of \$1.68 per \$100 assessed valuation. This includes 35 cents for schools.

In many cases departmental budget requests were less than they were for the current year. Most of the increases reflected normal salary raises for city employees based on length of service. The 1954-55 budget requests did not include a capital outlay fund or any general increase in salaries.

The largest proposed budget increase was in the Street and Engineering Department, which asked for \$122,935. Included in this total is a special \$32,500 engineering project for the north outfall sanitary sewer, \$17,000; replacement of inadequate sewer lines, \$10,000; canalization at Santa Fe and Pomona Avenues and Santa Fe and Ramona Avenues, \$5,000; resurfacing city streets, \$20,000, and \$6,000 for the construction of the Peralta-Posen storm sewer. A special gas tax fund would finance \$25,000 of this work.

Other proposed budgets to be considered are Police Department, \$128,358; Fire Department, \$110,794; city clerk, assessor and auditor, \$17,000; treasurer and tax collector, \$14,322; city attorney, \$6,057; civil defense, \$5,608; general government buildings, \$8,220; pound, \$4,665; health department, \$14,369; park (Continued on Page 7)

"Thanks for your wonderful gift - a Savings Bond!"

Dear Aunt Mary,  
Chuck and I are thrilled with your wedding gift! It was so thoughtful of you, and it means the beginning of a nest egg for us. We're starting right now to save regularly with Bonds, for all the things we want most!

Do you know a young couple about to be married? Give them the most appreciated gift of all—a U. S. Savings Bond. So simple for you; no worry about duplications, because duplications of this gift are always welcome! So wonderful for them: because an interest-earning Savings Bond increases in value with time.

Millions have discovered this safe, sure way to save "rainy day" money...

Have you a little extra money you're saving for emergencies? Then do as 43 million Americans are doing—put it where it's safe, and where it will work for you—in U. S. Savings Bonds! Bonds pay good interest—an average of 3% compounded semi-annually, when held to maturity. They can go on earning interest for as long as 19 years 8 months if you wish, giving you back 80% more than you put in!

You'll find, too, that you aren't so tempted to spend the money when it's invested in Bonds. Yet, should an emergency arise, your money is readily available.

Best of all, your money is safe. Cash destroyed is gone forever. But if your Savings Bonds are lost or destroyed, your Government will replace them free of charge.

Get into the habit of putting that "rainy day" money into Bonds. And—if you have a particular savings goal, find out about the Payroll Savings Plan where you work, or the Bonds-A-Save Plan where you bank.

Give the Gift of Security—U. S. Savings Bonds!

**HEALTH HORIZONS**  
Hazards In Your Home

We usually think of home as a refuge. But unfortunately, it seems to be harder and harder to be really "safe at home." For a shocking number of people, their own houses or yards have turned out to be death traps—the place where one third of all accidental fatalities occur. The most tragic part about this is that most of these accidents could have been easily prevented, find Drs. Barnes Woodhall and Jay Arena of Duke University.

"Simple omissions or faults cause the greatest number of hazards and tragedies" in the home, they concluded after studying accident records. They list some of the commonest hazards—conditions that often exist even in the best of homes, ready to trap you or your children especially. These are so simple as to "seem obvious and perhaps trite." Yet they caused many tragic deaths.

**A Checklist for Your Home**

Here is what they found—and it makes a good checklist to use on your own home. "The medicines and poisons were not kept out of reach of children or the medicines were not labelled. The electric cords were not in good condition. There were open electric sockets in which children could stick their fingers or tongue or some metal object. The attic and basement were not free of oily rags and litter. The stair treads were not securely fastened down. There were no hand rails on the basement stairs. The stairs and hallways were poorly lighted. The scatter rugs were not fastened down or made slip proof. The radio or electric light pull were too near the bath tub. The hot radiators and pipes were not covered. There was not a gate at the head and foot of the stairs to prevent the

small child from falling downstairs or from climbing up. The furniture and lamps were not heavy enough and consequently they could easily be pulled over. The second story windows were not barred to prevent the child from falling out. Handles of the frying pans, coffee pots, etc. on the stove were not turned away..." Pins, needles, scissors, knives, matches were not kept in a safe place.

**Your Responsibility**

"The problem is one that can not be solved with microscopes and test tubes," the authors conclude. "Something can be done, however, for accidents do not result from fate, bad luck or circumstances beyond human control. They can be prevented!"

**SCHOOL DAY SWEETHEARTS** at Albany High School who today are Mr. and Mrs. Paul Charles Copel (Betty Jean Bishop), pose for their first picture as newlyweds following their Northbrae Community Church vows. **BLACKBERRIES HAVE COME INTO THEIR OWN** Long ago our ancestors used them almost solely for preserves. However, today we prize them especially for their flavor, particularly when this flavor is held in homemade berry jelly and jam.

Today, making your own spreads is time-saving and very little effort when you use Certo or Sure-Jell fruit less than fifteen minutes after the fruit is prepared, you have your glasses with a tasty and delectable spread.

**BLACKBERRY JAM**  
Yield: about 10 medium glasses

4 cups prepared fruit 1/2 bottle liquid  
7 cups sugar fruit pectin

First, prepare the fruit. Crush completely, one layer at a time, about 2 quarts fully ripe blackberries. Sieve half of pulp into some of the seeds. Measure 4 cups pulp into a very large bowl. Then make the jam. Add sugar to fruit in saucepan. Well. Place over high heat, bring to a full rolling boil, and 1 minute, stirring constantly. Remove from heat and stir in fruit pectin. Skim off foam with metal spoon. Then stir by turns for 5 minutes to cool slightly, to prevent foaming. Ladle quickly into glasses. Cover jam at once with waxed paraffin. (ANS Features)

"At Home" in El Cerrito after returning from a Las Vegas honeymoon are Mr. and Mrs. Paul Charles Copel (Betty Jean Bishop), who were married recently at Northbrae Community Church. Rev. Laurence L. Cross officiated at the afternoon ceremony which was followed by a reception in the church parlor.

Daughter of Mr. and Mrs. John Sousa Bishop of 945 Kains Ave., the bride was given in marriage by her father. Her waltz length wedding gown was of nylon and lace over satin, designed with long sleeves and a sweetheart neckline. A matching tiara secured her fingertip veil and she carried a bouquet of white roses with Stephanotis centered with a white orchid.

Mrs. John Sutherland preceded her sister as her matron-of-honor, and the trio of bridesmaids were Lila Bertino, Carol Clark and Ann Durbin.

Dan Copel of Albany assisted his brother as best man, and ushering were Phil Pocararo, Tom Drennen and John Bishop.

The new Mrs. Copel was graduated from Albany High where she and her husband were school day sweethearts. She is now employed in Emeryville.

The groom, son of Mr. and Mrs. Milton Copel, of 1494 Marin Ave., was graduated from Albany High and is attending San Francisco State College. He is a part-time playground director at Cornell School.

**New cable sheath saves money**

If you look closely at the telephone cables in the picture—both similar to the ones that carry your calls—you'll see a difference in their coverings. The outside of the cable on the left is made of lead. And, formerly, only lead did a good job of protecting the vital wires inside. But now we have a new cable covering called "stalpeth" (the one on the right). Perfected after long research, it's made of aluminum, steel, and plastic. Stalpeth weighs less than lead and costs less—up to 43 cents a foot less. We're using it wherever we can... to

furnish more service, good service, at low cost to you. Pacific Telephone works to make your telephone a bigger value every day.

Now honeymooning in Southern California are Mr. and Mrs. Robert Caya (Dorothy Amundsen), who recited their wedding vows Sunday afternoon at a nuptial mass at St. Augustine Catholic Church in Berkeley.

## Pink Beauty Makes Bride's Dessert

Strawberry-frosted white cake gives a glow to a shower for bride.

Refreshments at a bridal shower should be dainty and pretty. A heart-shaped cake iced with Fresh Strawberry Frosting meets these requirements beautifully. If no heart-shaped pans are on hand, bake the batter in round pans. Then decorate the top with heart-shaped designs.

A white cake makes the nicest foundation for this cake. Use your own favorite white cake recipe, or one of the excellent white cake mixes. Fresh Strawberry Frosting beautifully dresses up either one.

The flavor of this tempting frosting is due to the combination of margarine and berries with confectioners' sugar. The margarine also gives the frosting a rich body which makes it hold its shape when spread on in swirls. The crushed berries give a wonderful flavor at the same time that they tint the frosting a delicate pink.

When icing the cake, reserve about 1/2 cup of the frosting to use as garnish. After the whole cake is covered, make a wreath of "leaves," or arrange them in heart shape. Simply dip up some frosting on the edge of a teaspoon filling the spoon almost half full. With a knife or spatula push the frosting off the edge of the spoon on to the cake. The
